This summer, the corporations ENI and GALP want to drill the Portuguese coast for oil and gas exploration. The local populations, social movements and local governments have been opposing this project for years, but the decision makers do not seem to be interested in listening to the people.

We will organize and mobilize until all oil and gas contracts are cancelled. On April 14th, we will all unite in Lisbon to say a big “NO!” to the fossil fuel industry, and a bold “YES!” for our ocean, for our future, for our coasts and for our climate.

Join us on **April 14th** at **15h00** in **Largo de Camões**.
